

## Co – location

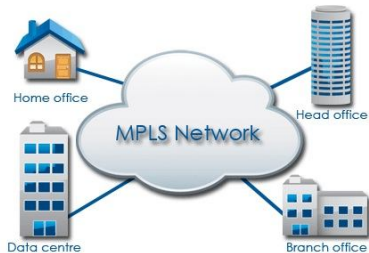

LIBTELCO provides its facilities including towers and office buildings along with 24/7 electricity and security to the public for the hosting of servers and other telecommunications hardware.

Without fuss, you can setup your projects or data centers, create your own network, and link your offices to the rest of the world.

## MPLS

Connection has never been easier. At LIBTELCO, we pride ourselves on

providing solutions that suits the needs of all. From individual users to very complex organizations, we have what it takes to make your work fun and easy. With our MPLS solution, the world is so much closer.

Companies can now communicate with their oversea branches in real time over a secure network. An MPLS network connects offices in different locations around the world.

## FTTH (Home Fiber)

Study at any overseas university of your choice from the comfort of your home, watch live TV programs and sports games, and keep in touch with family and friends using Liberia's fastest and most secure network at the lowest price imaginable.

## Liberia Telecommunications Corporation

*"Making tomorrow's connections today."*

## About Us

The Liberia Telecommunications Corporation, formerly LTC, was created by an act of legislature in 1973. In 2007, the act creating the old LTC was revised creating a rebranded Liberia Telecommunications Corporation, LIBTELCO, with a mandate to provide telecommunications services to all of Liberia. LIBTELCO is still 100% government owned and is a bigger and bolder company using exclusive local expertise while delivering solutions that meet international standards. LIBTELCO through its visionary leadership led the effort that brought fiber optic broadband internet connectivity to Liberia for the first time in early 2012.

***“Empowering Liberia through fiber optic broadband communication.”***

## What we offer?

### Fiber Optic Broadband Internet Service

Using cutting edge technology aligned with international standards, LIBTELCO provides internet services that meet the needs of the Liberian public. LIBTELCO serves the public with a 100% Liberian expertise.

LIBTELCO delivers high speed broadband internet connectivity to homes, offices, schools, and hospitals using its fiber optic cable. Fiber Optic is the gold standard of internet connections and remains the most reliable, exceptionally secured, lowest cost, and fastest mode of internet connection anywhere in the world.

### Dark Fiber Service

Do you have a large organization with two or more branches and need a secure mode to transfer data? LIBTELCO dark fiber is your solution.

Dark fiber, also known as leased lines, is used to connect offices with various branches that require a secure path to share internal corporate data. This is a secure path for data transfer.

### VOIP

Thanks to LIBTELCO. We are committed to providing 21<sup>st</sup> century technology in Liberia. Putting our country on par with countries the world over is our specialty. Hence, voice over internet protocol or VOIP.

This world class technology allows you to use our high capacity broadband internet to make voice calls as if you were using a regular telephone or mobile phone. Make cheaper and clearer local and international calls using our VOIP platform.
